EDUCATION

Sreenidhi Institute of Science and Technology   **Hyderabad**
Bachelor of Technology (B.Tech) in Computer Science and Engineering (CSE-CS)   Nov 2022 - June 2026

EXPERIENCE

Mern Stack Developer   **Mar 2024 - Aug 2024**
Wission Axis   Remote
- Delivered a highly user-friendly and seamless experience by designing and developing a responsive web application with a focus on intuitive navigation, clean UI/UX, and robust functionality.
- Optimized workflows and implemented scalable features to enhance accessibility and usability
- Achieved measurable improvements in engagement and satisfaction through iterative testing and feedback.

Technical Lead   **Dec 2023 - present**
Students Developers Community   Hyderabad
- Served as the Technical Lead for the Student Developers' Community, successfully organizing tech events and hackathons to foster innovation and collaboration among peers.
- Conducted interactive workshops and classes on diverse tech domains, empowering students with practical knowledge and skills.

PROJECTS

ArthGyan - Financial Literacy Platform | JavaScript, Node.js, MongoDB, React.js, Express.js   **Github**
- A web-based platform designed to enhance financial literacy in India, developed during a 24-hour hackathon.
- Provides users with comprehensive knowledge on personal finance, investment strategies, and budgeting through interactive modules, quizzes, and real-time financial news
- • Empowers users to make informed financial decisions with a focus on accessibility and user experience, ensuring education is engaging and inclusive for diverse backgrounds.

CryptoMark | HTML5, CSS3, JavaScript, Node.js, MongoDB   **Github**
- Developed a responsive cryptocurrency tracking platform to monitor real-time prices and trends.
- Designed an intuitive interface for users to explore market insights and make informed decisions
- Integrated backend functionalities to fetch and display live cryptocurrency data, ensuring accuracy and reliabilities.

fdXchainge – Tokenized Fixed Deposit Platform | Solidity, JavaScript, React.js, Node.js, MongoDB, Express.js **Github**
- Developed a prototype enabling users to tokenize FDs as NFTs, facilitating real-time peer-to-peer trading and lending.
- Ensures instant liquidity and flexible withdrawal options through a decentralized marketplace powered by trustless smart contracts.
- Built with a focus on security, transparency, and user control, incorporating on-chain KYC checks and a modular DeFi architecture.

TECHNICAL SKILLS

Languages: Java, C , JavaScript .

Frameworks: Express.js , Node.js

Dev Tools: Git , GitHub, Figma , Postman, Socket IO , VS code .

Libraries: React.js , Tailwind CSS, Bootstrap
